

Small FotoPrints from transparency film are scanned on our Imacon scanners and produced on FotoTechnika's Noritsu 3011 Digital Minilab. Each print is individually analyzed for density, color and contrast. All prints are produced on Fuji Crystal Archive paper and are available on either matte or gloss surfaces; either borderless or with borders upon request.

- Standard turnaround time: approximately 5 to 7 business days, depending on size of order and current workload.
- Rush charges may apply to orders required in less than standard turnaround time. See **Policies & Procedures P.2: RUSH Service**.

- Color transparency/slide film can be printed in color, B&W or sepia.
- Scala B&W transparency film can be printed in B&W or sepia, but may incur additional charges because of scanning difficulties common to this specialized film.
- Single cut medium format transparencies for reprints must be provided in individual pockets or sleeves.
- 35mm panoramic prints can be printed in 10", 12" and 14" lengths on 4" or 5" matte paper.
- Stated print sizes are approximate; image framing is as full as film carrier allows in each format.
- Standard borderless print sizes showing full image or "full frame"
